1ST/2ND GRADE NEWS

TUNBRIDGE CENTRAL SCHOOL

Dear First/Second Families,

Last week was very busy for us!

The disguised turkeys and stories all turned out wonderfully. They are displayed in the hallway. Take a look.

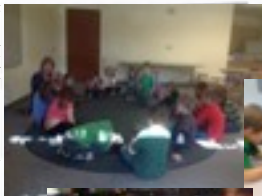

We had a very informative professional development day. We hate to be away from the students but we learned many ways to enhance our classrooms. One take away was the importance of read aloud and discussing vocabulary and comprehension during. This is something you all do at home also while helping with your student's reading journals.

The first graders had a great time making Stone Soup. We shared with the second graders at the end of the day. It is a great way to get kids to eat vegetables while teaching them about being part of a community.

Have a wonderful, restful Thanksgiving!

Montshire Trip

There is no better way to "teach" science than with a hands on field trip. This was another take away from our class last week so it was great that we had already planned the trip. The students not only got to explore the museum but they also got to learn about fossils. They got to make there own fossil

which should be in a baggy in his/her back. My favorite part of the field trip was hearing 3 boys discuss why the ball pushed by air through the longer tunnel was quicker than the ball on a shorter, curvy path. They were truly being scientists and figuring out the whys of the experiment.
