

Dear First and Second Grade Families,

We have had some fun days skating outside. Please send your child in with an extra pair of long socks for skating. Mrs. Brown's Donor's Choose project was completely funded for six pairs of ice skates and six helmets!

Students are finishing up on their habitat flip books.

This Spring, we would like to incubate eggs in class. Please let us know if you have eggs that you would let us incubate.

First and Second Graders completed a Valentine craft on Thursday,

that were very sweet. Please have your child bring in Valentine's on Monday. We will have a party in the afternoon. Both classes will have a chance to exchange Valentine's with each other.

On Wednesday, we had an assembly led by Mr. Farnsworth on playing board and cooperative games. It was nice to see students playing with students from other grade levels.

We hope you have a nice weekend filled with family and love!

Mrs. Brown, Mrs. Hook

First Grade Foundations: We started Unit 8 in Foundations. The 1st graders are having some difficulty with hearing and spelling blends.

First Grade Math: We are working on place value still. They are doing very well with tens and ones but at times get confused about which one is which.

Second Grade Foundations: Second Graders continue to work on unit 10, which focuses on the double vowel syllables.

Second Grade Math: Students did an awesome job on their last math test. They started chapter 7, which focuses on subtracting three digit numbers.
