

# 2ND GRADE

*Second Graders Explored Seeds and Adaptations in the classroom with help from the Montshire Museum of Science.*

Dear Second Grade Families,

This week was a challenging but fun week. On Tuesday I had a substitute teacher as I was at a PBiS conference. This conference was great and it gave me a lot of ideas of how to keep the students engaged. I wanted to thank Krystal West for being in the classroom for me and helping everything to run smoothly!

This week we did another review of Unit 3 as they weren't ready to go onto the next unit. We will start unit 4 on Monday. This unit will teach about comparing suffixes.

In Math, we will work on repeated addition using arrays and sums of equal numbers.

During Science, we will be winding down soon on our plant unit. We will then be moving onto learning about weather.

Please keep sending in any gallon milk containers that you have. I am going to need a lot.

I am looking forward to our parent teacher conferences next week. Have a wonderful weekend!

Mrs. Hook

***Exciting News:***

*\*The Montshire Museum of Science came to our class and*

*helped teach students about different types of seeds. Students had a chance to use a*

*microscope, which was fun to watch.*
